Summary

Full-stack developer and ML engineer building production-grade systems — from a DPDP Act compliant, multi-tenant SaaS platform to ML-based predictive models with sub-200ms inference. Founded VIT Bhopal's 100th official club and placed 50+ peers into industry internships through direct startup partnerships.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Flask

Databases: MongoDB, PostgreSQL

Backend & APIs: REST APIs, JWT Authentication, Mongoose, Swagger/OpenAPI

ML / AI: Scikit-learn, NumPy, Pandas, Matplotlib, Gradient Boosting, InsightFace

Tools & Platforms: Git, GitHub, Vercel, Render, n8n, Cloudinary

Experience

Software Development Intern

May 2026 – June 2026

WEWIN Engineering Services & Suppliers Pvt Ltd.

On-site

- Developed an enterprise-grade IT Service Management (ITSM) platform using Next.js, TypeScript, .NET, PostgreSQL, and RabbitMQ to streamline incident management, service requests, and asset tracking workflows.
- Implemented Role-Based Access Control (RBAC), JWT authentication with refresh tokens, SLA monitoring, ticket lifecycle management, and real-time analytics dashboards for Admin, Agent, and User roles.
- Designed scalable system architecture following Clean Architecture and CQRS principles, integrating asynchronous background processing for workflow automation and SLA tracking.

Full Stack Intern

Feb 2026 – Present

Datatrack

Remote

- Built n8n automation pipelines integrating 5+ external APIs to streamline data processing workflows, reducing manual effort by an estimated 60%.
- Designed multi-node transformation logic handling real-time API orchestration in production environments.

Research Team Lead

Sept 2025 – Present

EvolVIT, VIT Bhopal University

Bhopal, Madhya Pradesh

- Founded VIT Bhopal's 100th official club; onboarded students into industry internships by sourcing real-world problem statements from startups within 6 months of launch.
- Spearheaded Idea2Industry — ran ideathons and coordinated industrial visits (e.g., Appointy) connecting students to end-to-end product development cycles.

Projects

Atithi — Multi-Tenant Visitor Management System

June 2026 – Present

Node.js, Express, MongoDB, React, TypeScript, Python/Flask

visitor-management-system-ochre.vercel.app

- Architected multi-tenant VMS with JWT auth and 6-tier RBAC (Super Admin to Security), meeting DPDP Act 2023 compliance for Indian enterprises.
- Built self-hosted facial recognition microservice (Python/Flask/InsightFace) for biometric check-in and blacklist detection, plus Telegram Bot-based host approvals — eliminating third-party API costs.
- runtime-configurable MasterData system supporting 5-language localization; shipped Swagger-documented REST APIs with rate limiting and audit logging; deployed on Vercel/Render.

CrashRisk — Predictive Aviation Safety Intelligence

Sept 2025 – Feb 2026

Python, Gradient Boosting, Scikit-learn, Flask

crashrisk.onrender.com

- Built a full-stack ML app classifying flight scenarios into 4 risk tiers using a Gradient Boosting Classifier trained on historical aviation data; deployed on Render with sub-200ms response times.
- Engineered a live Risk Simulator with 11 parameters that surfaces non-obvious factor interactions — e.g., pilot experience outweighing adverse weather conditions.

Education

VIT Bhopal University

Sept 2024 – 2028

B.Tech in Computer Science Engineering — Artificial Intelligence & Machine Learning

Bhopal, Madhya Pradesh

New India Public School

2022 – 2024

Higher Secondary (Class XII)

Bhopal, Madhya Pradesh

Jawaharlal Nehru School

2012 – 2022

High School

Bhopal, Madhya Pradesh
